Founded in: 1995
Number of employers (2017): 60

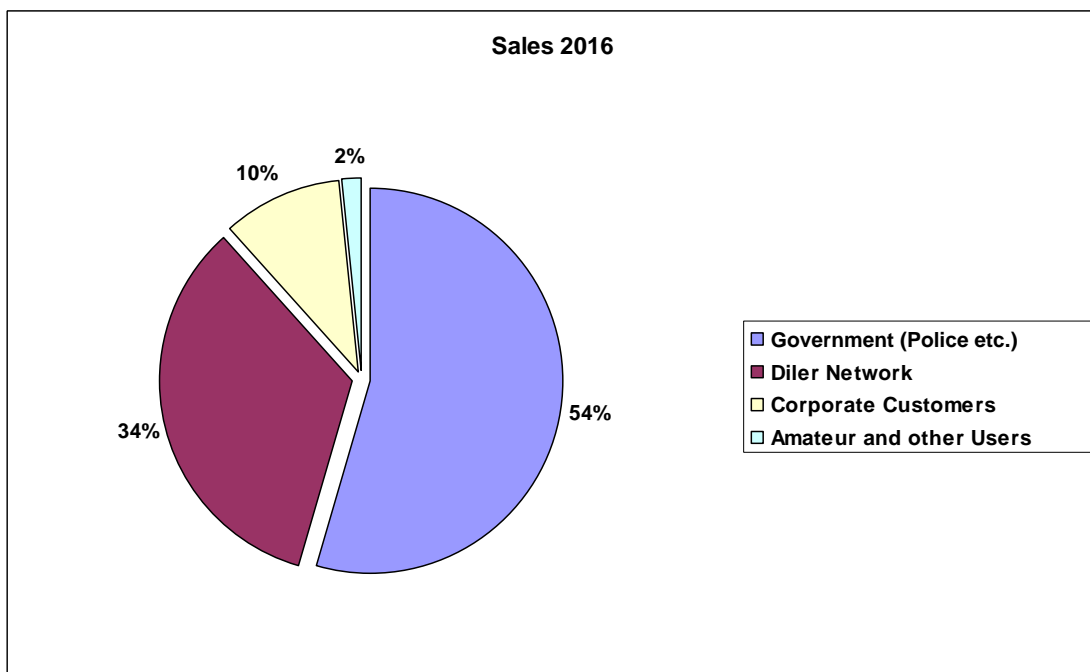

Sicom Company was founded in 1995 as a Radio Communication equipment reseller company. For the last 21 years Sicom has experienced a rapid growth and now is one of the top distributor and integrator company in Russian communication market.

Sicom's strategy:

- Diversification of activities, business interests are allocated in different sectors of radio communication industry. The main goal is to provide all resources required for a total solution of customer's tasks with no third-party participants.
- Business activities throughout the Russian Federation and ex Soviet Union republics, active work in regional centres of Russia and CIS.
- One of the company's main tasks is to support development of radio communication equipment for Russian State Structures (Police, Ministry of Emergency etc.).
- Developing and manufacturing original and special communication solutions for all customers

For 21 years of successful business Sicom created infrastructure that does not have analogies in Russian radio communication business. Our today's «geography» includes Head office in Moscow and more then 100 dealers and partners in most developed industrial regions of Russia, Byelorussia, Armenia and others.

Sicom Turnover in groups of customers (2016)

Today **Sicom** employs more than 60 people and staff of regional representatives. We are very serious about professional training of our employees. Company's specialists had appropriate technical training and are certified by ICOM, AOR, Motorola and other well-known companies. No doubt, this is a guarantee that their services are delivered with ultimate quality.

Sicom is a «classic universal distributor» and «system integrator», we deliver wide range of radio communication parts and communication systems. **Sicom's** stock constantly holds products of more than 30 different vendors and the price list consists of more than 3000 items.

Sicom is authorized partner of

- Japan vendors such as ICOM, AOR, Diamond Antenna etc.
- USA vendors such as Motorola, PCTEL, Otto, Kantronics etc.
- China and Taiwan vendors such as Nietzsche Enterprise, JDI, Kirisun, Nicepower Tech etc.

Among our main activities are:

- Trunking and Digital communications systems;
- Dispatch and AVL systems
- Systems for data and fax transmission over radio;
- HF, Air band, VHF, UHF professional and amateur communication equipment;
- Receivers, radiomonitoring and pelengation systems.
- Marine, GDMSS coast and vessel equipment;
- LPD radios;
- Antennas for Digital Networks (WiMax, GSM, GPS etc.)

Many models of the equipment and accessories are developed and produced at direct participation of **SICOM**. For the orders of **SICOM** under a trade mark "VIHR" and "Sirus" in Russia there are producing radio stations, antennas, power units etc.

Especially it would be desirable to note development and production of digital gateway DRC-500 for remote control of mobile radio stations on distance up to 12000m. Also with the assistance of our specialists has been created the special version of digital Russian Scrambler 04XK200I for professional radios VIHR and ICOM.

The great attention is given to system projects. In 2012 specialists of **SICOM** had been developed, make and mounted System of Digital Radio communication (ICOM IDAS NXDN) for needs of the Department of Internal Affairs of Moscow Region. Programmers of the company had been developed dispatching system and the automated work places of operators including modules of record of conversations and system of positioning on the basis of GPS/Glonass.

SICOM gives the main attention to the certification of the equipment. All professional equipment is provided by Certificates of conformity. As a result of the testing which have been conducted by scientific research institute of Special Techniques of the Ministry of Internal Affairs of Russia, for the basic professional models **ICOM** and the **VIHR** our firm receives official "Acts of conformity" to requirements of the Ministry of Internal Affairs of Russia.

SICOM constantly works over improvement of quality of delivered goods and services. In 2016 has been received the certificate of conformity of system quality management to requirements of **GOST R ISO 9001**, with reference to design, development, production, delivery, installation and servicing of radio communication systems.

We are aiming to assist you in finding your way in these dynamically developing businesses and making your work more efficient by supplying the cutting edge reliable equipment of the world's leading manufacturers.

Many years of successful experience and thoughtfully developed service system allow us to guarantee not only the individual attention to our customers but also the best "price-quality-service" ratio while keeping the wide range of the equipment in our stocks.

We look forward to fruitful and long-term co-operation.

Faithfully yours,

Sicom
